# Chromastics Color Formulary

26 Permanent Formulas

6 SuperGlaze Formulas

6 Demi-Permanent Toner Formulas

16 High Lift Formulas

5 Super High Lift Blondes

---

## When do I use each group of formulas?

**Permanent** color formulas can be used on any percentage of white hair. The more natural color and the less white, the deeper the formulas will appear.

**SuperGlaze** formulas are designed for salt & pepper hair when a more blended color result is desired. They are not for complete “gray” coverage.

**Toner** formulas are to be use on hair that has been lightened to light yellow. Timing can be as short as 5 minutes or as long as 20 minutes depending upon the porosity and texture of the hair.

**High Lift** formulas are designed for both pigmented and salt & pepper hair when 4 levels of lift are desired.

**Super High Lift Blonde** formulas are designed for hair that is light brown or lighter when maximum lift is desired. When use on deeper natural hair levels a warmer color will result. For more tone add an additional 3 to 4 grams of the level 6 color.

**Processing time** is always determined by the colorist. The coarser or darker the hair, the longer the processing time, generally 35 to 45 minutes. Fine hair may take as little as 20 to 30 minutes.

# Ash Formulas

## **Light Ash Blonde**

60g 8N + 2 inches Green Concentrate +  
60 g 25 vol. developer

## **Dark Ash Blonde**
