

Super-Shiner

A Quick, "On-The-Spot" Service

Going out for an evening or a special event
and want extra shiny, luxurious hair?

A Super-Shiner from Chromastics will do just that.

Super-Shiner is a long-lasting high gloss finish designed for both natural and color-treated hair.

We shampoo your hair, towel dry, apply the Super-Shiner, wait 10 minutes, rinse and dry. You're ready to go with amazingly beautiful shiny, conditioned hair.

Super-Shiner uses only Liquid Shades mixed with 10-volume developer.

The mixture is applied to hair that has been shampooed with Clarifying shampoo and towel dried. It is processed for 10 minutes, and then rinsed. Do not use any conditioner other than Leave-In.

I suggest only the following shades:

L-Clear	L10RO
L10G	L10
L10N	

They are processed for 10 minutes, ensuring the high-gloss results but with minimum color.

L10N and L10G are used for all brunettes, either by themselves or intermixed.

L10G by itself beautifully enhances all natural salt and pepper hair.

L10A and L-Clear are intermixed for hair that has a slight yellow look to it.

L10RO is used for all redheads

L-Clear can be intermixed with any Liquid Shades color.
